

How to pay securely with PayTo

PayTo is a secure, modern alternative to direct debit. It lets you authorise a payment directly from your bank account through your own bank.

1 Choose PayTo

At checkout, select PayTo and enter your PayID, or your BSB and account number. You do not need to enter card details.

2 Look for a bank message

Your bank will let you know that a PayTo agreement is waiting for approval. This may be a push notification, SMS, email or an alert when you open online banking.

YOUR BANK

PayTo agreement ready

A payment agreement is waiting for you to review in your bank app.

Example notification

3 Review and authorise

Open the agreement in your bank app and check the law firm, payment amount and agreement details. If everything looks right, follow your bank's prompts.

Payment amount

\$1,500.00

Authorise in your bank app

Example only - bank screens vary

4 Payment complete

Once authorised, the payment can be processed and LEAP Online Payments will email you a receipt. Your bank may also show or notify you that the one-off PayTo agreement has been cancelled after payment. This refers to the agreement, not a failed payment.

Need help finding PayTo in your bank?

For bank-specific PayTo instructions, visit the Australian Payments Plus consumer guide: auspayplus.com.au/solutions/payto-for-consumers. You can also search your bank's website for 'PayTo agreement'.
